

# INTENTIONS TO SUPPORT HEALING FOR VIRUSES AND CANCER SHORT FORM

Rev. Mary “Mo” Wheeler and the Energy Healing Partners Team

5/8/19

Viruses and cancer are so related we believe they can be considered together. This is not intended as medical advice or as a substitute for professional medical care. It is a short, but equally valid, version of the 244 statements that we have also developed.

Because there will be statements in the intentions related to the DNA, I need to be *heard or seen* saying these intentions in order for *all* of them to be carried out completely, OR, *you* can hear someone else say them and then you say, “*Mo, please help.*” Two people need to be involved, so that there is a witness to the work.

Some statements are so ancient that we can’t possibly understand them. I simply say, “I want this intention manifested,” and Spiritual helpers carry them out. I have many different types of helpers, and for many statements in this work I call on a particular one to help. Here, they include mostly animals and birds.

With “M Infinity O’s,” you are asking for *unconditional love (M) into infinity in all there is (O)*, and the work of the Energy Healing Partners Team that cannot be refuted will be manifested for you, if needed. You only need to say it once.

Because some of this work will occur at the molecular level, you need to allow at least 29 days for completion.

1. I want the *Intentions to Support Healing for Viruses and Cancer.*

2. Mo says, “I want these intentions in M $\infty$ Os.”

Please say to yourself after me:

“For myself and all my parts—from the smallest to the largest, in all seen and unseen body parts with consciousness, and in all time/space and in-between, I want irrefutable M $\infty$ Os.”

3. I want the DNA healed in all chromosomes.

4. I want the counterclockwise DNA to have flexibility of movement.

5. I want the DNA reset, reconfigured and recalibrated.

6. I want gene checking mechanisms upgraded and then activated so that cell damage can always be detected, and cells can maintain the ability to undergo programmed cell death.

7. I want the ability of virus cells and cancer cells to undergo abnormal growth destroyed at all levels, including the level of DNA.
