

CHRONIC SINUSITIS

Rev. Mary “Mo” Wheeler PhD 10/20/19, revised 6/20/20

INTRODUCTION TO VIDEO (1 page)

Chronic Sinusitis is a common disorder and may last for a brief time or persist for months or longer.

It can be brought on by an infection or the common cold, a virus, or a bacterial or fungal infection. It can also be caused by an allergic reaction to something in the environment (such as mold, pollen, or dust).

Regardless of the cause, we believe its source in time is ancient, and thus we can't know or understand it. However, it is worth the time to request healing by listening to the DVD.

STATEMENT(S) OF INTENTION:

I want healed chronic sinusitis in all time, space, and in-between.
